

# UTHMAN AJANAKU

FULLSTACK DEVELOPER

Full-stack Web Developer passionate about creating scalable, secure, and high-performing web applications optimized for all browsers. Proficient in React, JavaScript, and Node.js, with recent experience integrating AI solutions into web applications. Demonstrated success in delivering efficient, reliable, and user-focused digital products. A collaborative problem-solver who thrives in fast-paced, impact-driven environments.

## EXPERIENCE

- Developer** Jun 2025 - Nov 2025  
**Pinkerton Construction**  
Designed and developed a responsive, high-performance company website, boosting client acquisition and engagement by 35%. Integrated dynamic project showcasing and streamlined content management, improving site update efficiency by 40%. Optimized front-end performance using React and Tailwind CSS, achieving faster load times (under 2s) across all devices. Collaborated closely with stakeholders to align digital presence with brand identity, strengthening market credibility and client trust.

## PROJECTS

### DevTide

A react based fullstack personal blogging platform documenting my tech growth with interactive commenting.

### Torii Gate

Torii Gate is a fullstack housing platform connecting House Owners and House Hunters for seamless property deals.

### KanFlow

it's a cross-platform productivity ecosystem consisting of a responsive Web Dashboard (Next.js) and a native Mobile App (Expo/React Native), enabling users to manage tasks seamlessly across devices.
